

## **GPS commences micro-tunnelling work on Seeb wastewater project**

*25 April 2009*

MUSCAT – **Gulf Petrochemical Services & Trading LLC (GPS)** and their JV partners kick-started the micro-tunneling works as part of their RO55 million contract with Haya Water for A'Seeb wastewater project. A brief ceremony to mark the start of micro-tunnelling of approximately 20 kms for the main sewer system was held last week at a location near Barka. The ceremony was attended by senior management personnel from the client, Haya Water, consultant Parsons International, **GPS** and their JV partners kick-started the micro-tunneling works as part of their RO55 million contract with Haya Water for A'Seeb wastewater project. **GPS** is a leading Omani engineering, procurement and construction (EPC) contractor with considerable experience in the field of oil, gas, water, wastewater and other infrastructure projects in the region. The company has more than 26 years of experience to its credit. The project is for the construction of a Main Sewer Collector Pipe Line from Muscat City Centre to Bait Al Barka Sewage Treatment Plant (under construction). The diameter of the pipes varies from 600mm to 2000mm depending upon the volume of estimated flow of sewage.
