Enpark to host third module of Green Building

23 September 2009

Energy and Environment Park (Enpark) yesterday announced that it will co-organise "Architecture and Daylight", the third module in the Green Building conference series. Enpark is a sustainable community model for commercial and residential use and a member of Tecom Investments.

Hosted in collaboration with Sesam Business Consultant and Epoc Messe Frankfurt, the event will be held from September 29 at the Dubai Knowledge Village Conference Centre. It will comprise a series of presentations, open debates, a training workshop and project tours focusing on key elements of the green building industry.

The module will look at energy-efficient lighting design and technology in the UAE.
