

Doha Green Conference to begin on Dec 9

December 04, 2009

Current, upcoming initiatives and long-term vision for sustainable planning and managing buildings will come under focus at the Doha Green Conference to be held on December 9 and 10.

The event is being organized by Sesam Business Consultants in collaboration with the Friends of Environment Centre and UNESCO. The concept takes Qatar-specific requirements into consideration in relation to sustainable building activities, longterm vision, current and upcoming initiatives, and the parties involved in the process.

Doha Green will be made CO2-neutral with investments into carbon offsetting projects. "Sesam Business Consultants has been active in setting the stage for green building conferences in the UAE and neighboring countries over the past two years," said Philipp von Zitzewitz, conference manager, Sesam Business Consultants, in an Oxford Business Group newsletter.

"Our aim is to raise awareness and promote education on the protection of our environment, in particular with a view to sustainable planning, building and managing of buildings," he added.
