

Conmix: Reaping green from new technology

01 November 2008

Conmix Ltd is one of the most reputable manufacturers of ready-mix concrete, pre-mix plaster and construction chemicals in the UAE. The company launched a piling division in 2007.

Established in 1975 in Sharjah, Conmix is a joint-venture between the Bukhatir Group and German Gulf Enterprises Limited.

The Bukhatir Group is a highly diversified conglomerate operating in the following industries: building materials, contracting, information technology solutions, real estate, shopping malls, sports, media and education.

German Gulf Enterprises Limited is a UAE-based engineering and trading company representing some of the world renowned manufacturers of heavy vehicles and equipment used in the construction industry.

The core business of Conmix is ready-mix concrete. Conmix designs and supplies ready-mix concrete meeting the exact requirements of specifiers. Through its team of experienced engineers and concrete technologists, the company can supply high-performance durable concrete for all applications and requirements.

The company has numerous modern, computer controlled batching plants with a combined capacity of approximately 200,000m³ per month.

Located at Umm Al Quwain, Ajman, Sharjah, Dubai, and soon in Abu Dhabi, the plants are geographically well spread out to ensure prompt and smooth delivery of concrete to sites, and products are manufactured in accordance to the prevailing international standards.

Conmix has always promoted new technologies beneficial to the construction industry. The company follows a quality management system certified to ISO 9001:2000 maintaining quality assurance in design, development, production, installation and service. All products meet the relevant international standards.

The company has followed a policy of being environment friendly from the start of its operations. Conmix was one of the first to install filters to stop emission of dust from silos into the atmosphere. Highly specialised equipment is used to recycle waste or excess concrete.
