

Industrial Precinct of Dubai Maritime City Successfully Conducts Load Test for World's Largest Mobile Boat Hoist

28 December 2008

Dubai –**Dubai Maritime City** witnessed another milestone yesterday after a successful load test was conducted for its BHT 700/16 mobile boat hoist. The hoist, which will be featured within **Dubai Maritime City's** Industrial Precinct, comes at a cost of DHS 14 million. Built in Italy, the hoist weighs 300 tonnes and is capable of lifting 720-tonne boats.

It is expected to complement **Dubai Maritime City's** two ship lifts as it will concentrate on the handling of smaller crafts, particularly mega yachts. To be operated by Drydocks World - Dubai, only Italy and Spain operate the exact same model as the one featured in the UAE, which is considered the largest in the world. The hoist is expected to be operational by early next year. Pictured is the hoist as it lifts a vessel during the testing.
