

New Boat Maintenance Service Launched by Dubai Maritime

18 December 2008

DUBAI — Dubai Maritime City has announced that boat owners can now avail of new services within the integrated maritime centre in less than one hour.

“The new range of services were unveiled after Palm Marine Yacht Services recently completed the installation and commissioning of Sealift2, a unique rolling deck, floating dry dock platform at Dubai Maritime City,” Steve Butcher, Chief Operating Officer at Palm Marine Yacht Services, informed.

The Sealift2 platform joins Dubai Maritime City’s wide array of maritime services and amenities and strengthens the integrated maritime centre’s capacity to serve the rapidly growing maritime sector.
